Flexible Training Tailored to Your Learning Style

X-Rite Training Center

With a broad range of educational resources, X-Rite's Training Center provides customers with comprehensive and flexible training programs they need to get the best results from their X-Rite instruments and software.

On-line Learning

Utilizing the accessibility of the World Wide Web, X-Rite offers unsurpassed training—24/7—almost anywhere on the planet.

Learning Library

For customers who prefer learning at their own pace, X-Rite offers convenient self-study courses through the on-line Learning Library—<http://www.measureitrite.com>. Learning Library courses enhance product and color knowledge, provide brief product demonstrations and address specific industry applications.

Instructor-facilitated Training

For a more interactive and complete learning experience, students are encouraged to attend web seminars, available in three formats:

1. Training Sessions

These structured, introductory courses are hosted by X-Rite instructors and provide step-by-step instruction for instrument and software use. To participate, students need a PC, Microsoft® Internet Explorer, and a high-speed connection (ISDN or cable modem) suggested. Registration is required.

2. Study Halls

Study Halls are an open forum in which students pose questions to X-Rite experts and receive responses and feedback. In addition, fellow class members learn from one another. Registration is required.

3. Support Sessions

X-Rite's training staff designs personal web sessions for corporate customers. These sessions provide a tailored

approach to address specific customer topics and applications in a private environment. To arrange a session, please email our Training Administrator at training@xrite.com. Classes are scheduled based on staff availability and on a first-come, first-served basis.

For an up-to-date listing of all seminars, go to http://www.xrite.com/top_support.aspx. Review the dates, times, and topics that interest you and then register to secure your place in the class.

X-Rite's training staff reviews class loading as well as the questions and comments of our attendees. These reviews are used to constantly update the frequency and types of courses being offered. If there is a topic of unique interest to you, submit your idea or request to training@xrite.com.

Classroom Training

X-Rite continues to provide a variety of training sessions for instruments, software and color theory at both our offices in Grandville, Michigan, and regionally throughout the United States and Canada. Courses, dates, locations, and pricing information are all available on our web site: http://www.xrite.com/top_training.aspx

Personalized Classroom Training Alternatives

X-Rite's Training staff can also create a workshop specific to your individual company's needs. To discuss on-site options contact our Training Administrator at training@xrite.com.
